

UVC LIGHT SANITIZER

Allpurpose Contactless Sanitation

P2125 UVC Light Sanitizer

UVC light sanitizer emits ultraviolet (UV) light through three LEDs at wavelength of 260nm – 275 nm which can eliminate up to 99.9% of surface bacteria particles. Lightweight and compact design makes it easy take on-the-go and the built in battery recharges via Micro USB.

To use, press the power button on the back of the device to activate the three UVC LEDs and scan the object or surface at a distance of about 3/4 inch or closer for approx. 10-20 seconds. When finished, press the power button on the back again to turn off or the device will automatically power off after 3 minutes.

APPLICATIONS:

The UVC Light Sanitizer can be widely used at home, office, hotel, gyms, airplanes, public transport, or anywhere you go! Ideal for sanitizing phones, keyboards, toys, jewelry, seats, door handles, toilets, elevator buttons, masks, or any high contact objects.

SPECIFICATIONS:

- 1) The wattage is 1.5 W
- 2) A built-in rechargeable Li-On battery, 1500 mAh.
- 3) It takes about 3-4 hours to fully recharge & a full charge will last for about one hour of continuous use.
- 4) Micro USB cable included, packed in a gift box.

Size: 5 1/2" L x 1 3/8" W x 1 1/8" D

Color: White

Imprint: on flat surface approx 2"L x 3/4"W, limited to one color

Set up: \$43.75 (V)
